

# Permanent Eyeliner Aftercare Instructions

It is very important to follow these instructions carefully!

Color retention and proper healing can depend on your home care regimen

## **Day 1-10:**

- Gently wipe treated area morning and night with Green Soap on a cotton pad.
- Lightly apply a thin coat of ointment over the area with a clean finger morning and night.

## To Avoid Swelling

A gel ice pack can be applied to the area. Place the ice pack in a plastic baggie to avoid moisture on the pigmented area. Apply as needed a few minutes on then off.

## Avoid for 10 days

- Any makeup over the pigmented area.
- Hot steamy showers or long baths. Keep your face away from the shower head and dry immediately.
- Cleansers, creams or lotions on the pigmented area. Wash and apply around the area.
- Swimming, salt water, heavy exercise(sweating), saunas or hot tubs.
- Sun exposure
- Contact with animals
- Gardening

## Long Term:

- Any type of skin peels or products containing Retin-A and glycolic over the pigmented area
- Prolonged sun exposure; wear SPF after 10 days of healing

## Do Not

Pick, rub aggressively, peel, or scratch. This could cause scarring and/or removal of color.  
Do not touch the area except for applying Aftercare Balm.

## Note

Color will appear very intense and dark immediately after your procedure for a few days. The color is sitting on top of the skin. Once the skin starts healing or flaking, the colour will fade considerably as it heals beneath the skin.

The final color should not be considered for approximately 6-8 weeks after the final visit. Do not be alarmed if it appears that most of the color is flaking off. Some of this crusting will appear on your Q-tip- this is normal. This is the *superficial color* and is part of the natural healing process. Everyone's skin heals differently and results cannot be guaranteed after any treatment.

**If you suspect any signs of infection (including abnormal redness, swelling, tenderness, red streaks going from procedure sight to the heart, elevated body temperature, purulent drainage [pus] ) contact your doctor ASAP**

**All permanent cosmetics procedures are a 2 part process which require booking a follow up session 1-3 months after the initial session. Touch ups are priced by length of time since previous visit. Please schedule appointments a few months in advance.**
